

ABOUT PLC

Welcome to the world of PLC Company Ltd., where innovative automation meets exceptional enthusiasm. As a PLC manufacturer with 23 years of history, our team of experienced engineers.

PLC Company Ltd.
Brilliant / Generation / Strong

Our story began 23 years ago, evolving from a small workshop to become an international enterprise that holds a significant position in the field of factory automation today. Our vision to create robust, compatible, and flexible industrial controllers has now become a reality embraced by industries worldwide.

Our product range, from mini to large-scale controllers, caters to a wide array of industrial applications, from automotive to aerospace, making automation accessible and customizable for businesses of all sizes. Our products have been sold to over 150 countries worldwide, which not only proves the quality of our products but also reflects the global confidence in open-source industrial products.

Take Control of the Future

In a rapidly changing market environment, we understand that innovation is key to maintaining a competitive edge. We constantly seek innovation in our products, services, processes, and management to meet customer needs, enhance product value, and improve competitiveness. Meanwhile, we focus on sustainable development, ensuring long-term stable growth through establishing a robust operational system and strong internal resources.

Our goal is to become a leader in the field of factory automation. We will continue to introduce the most advanced FA factory automation control system products and technologies, constantly expanding the depth and breadth of our product line. By actively participating in major industrial control exhibitions, we continuously promote our technology and services, enhance our professional image and service standards, and win the trust and support of our customers.
